I'll do my best but I can't make any promises. I was hoping that since there were only three samples we might be able to hand crank this one but I do understand why you are asking.

Any chance you could get an Excel/csv EDD from the RPs?

I received the lab report for the RPs sediment samples. It would be good to try to get those in scribe as well. I think the RPs have validated these results by now but I do not have that report. I'll try to follow up with them to get some clarification on that but I wanted to pass these along for our purposes now.

Let me know if there are any questions,

Tom

Tom,

The analytical report for the three sediment samples collected in January is attached.
